

Top End Force[®]

The Top End Force is a rocket

The aerodynamic Force design offers an adjustable, lie-down, reclining or super recumbent position which ensures optimum speed using arm, shoulder and chest muscles. The center frame is reinforced with an internal rib making it super stiff for maximum transfer of power. The center frame design also allows for transfers that are easier than any of the other handcycles in its class. Force the Pace.

Force

Top End[®] Force[™] Handcycle shown with optional Zipp[®] 404 wheels.

Back is adjustable from 35 to 55 degrees.

Top End[®] Force[™] Handcycle Series
