

## Color Schemes Available

Note: Colors are very difficult to accurately portray on the web. The colors of your playground will be similar to the ones shown below. Currently, the colors are shown applied only to Fort Columbus as an illustration of the color combination. Eventually there will be pictures of all the playgrounds in each available color scheme.

At the bottom of this page, there is a chart showing the equivalent Crayola® crayon color from their 64-pack crayon box. The solid crayon colors are remarkably similar to the playground colors.

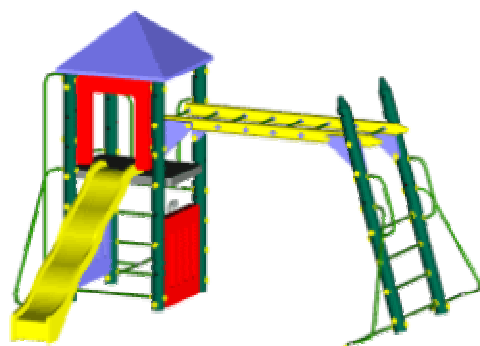

### Tropical Sensations

The first thing you notice when you visit the tropics is an almost overwhelming sensation of color - bright, vibrant, riotous displays of vivid reds, yellows, greens and other splashes of color beneath a bright blue sky and lit up with brilliant sunshine. This feeling is captured by ***Tropical Sensations***.

Red, blue, yellow & teal green rotationally molded plastic parts tied together with forest green powder-coated pipes.

### Tropical Rainforest

Tropical forests are filled with brilliantly colored birds, butterflies and flowers. So ***Tropical Rainforest*** uses forest green crayons to create the backdrop for vivid tropical colors of red, yellow and blue.

Red, blue, yellow and forest green rotationally molded plastic parts tied together with forest green powder-coated pipes.

## Tropical Sunrise

It is hard to describe the vividness and intensity of color in a typical tropical sunrise. In ***Tropical Sunrise***, the red and yellow of the sunrise are set off by the rich green pipes representing the palm trees greeting the new day.

Red and yellow rotationally molded plastic parts tied together with forest green powder-coated pipes.

## Ponderosa

A feeling of deep woods is portrayed by ***Ponderosa***, composed of woodsy brown and forest green with a touch of sunshine yellow. This is a good choice if you need to have a playground which needs to appear to become part of the natural environment.

Woodsy brown and forest green rotationally molded plastic parts are tied together with forest green powder-coated pipes and highlighted with yellow.

## Sherwood Forest

Teal green brings a touch more color to the forest green and woodsy brown environment, highlighted by warm sunshine yellow. Robin Hood and his merry men prefer ***Sherwood Forest***.

Brown, forest green and teal rotationally molded plastic parts are tied together with forest green powder-coated pipes and highlighted with yellow.

If you have a Crayola® 64-pack of crayons, you can see a very close rendition of our colors by looking at the crayons themselves (not coloring with them, but looking at the solid crayon color). Here are the equivalents:

What we call (click to view)	Matching Crayon name
<a href="#">Red</a>	Red
<a href="#">Yellow</a>	Yellow
<a href="#">Blue</a>	Periwinkle
<a href="#">Teal green</a>	Robin's Egg Blue
<a href="#">Forest Green</a>	Forest Green
