Dolphin Neurostim

All Natural, Drug-Free Pain Relief

Eliminate Chronic Pain

Health Science & Electronic Technology Working Together

The Dolphin Neurostim electrically locates and stimulates specific treatment points (motor, trigger, and acupuncture), which have been proven to help relieve many chronic pain syndromes.

Applying the Dolphin Neurostim to tightened or contracted muscles, or to treatment points relating to them, seems to “release” the muscles and permits increased reinnervation of their neural pathways. This process allows the patient’s pain levels to be substantially decreased.

Bill Bowling, DPT

What Does it Do?

- Relaxes muscles**
- Reduces nervous tension**
- Releases fascia**
- Releases scars**
- Increases range of motion**
- Improves circulation**
- Duplicates acupuncture**
- All in one simple to use modality!**

Take control of pain and manage it safely

Quickly relax tightened muscles, immediately improve range of motion and circulation!

Q&A

Is the Dolphin Neurostim difficult to use?

We think you’ll find that both our self-help unit and our systematic approach to pain management are extremely user-friendly. To shorten your learning curve, we include an easy-to-follow treatment manual with every Dolphin Neurostim. Additionally, we provide the best toll-free support line in the industry.

How effective is the Dolphin Neurostim for pain relief?

The majority of our patients, therapists and doctors have reported 50-75% relief within one or two treatments. Properly applied, almost every patient will respond favourably within 2-3 applications!

What does the medical profession say about the Dolphin Neurostim?

Practitioners all over the world are discovering the benefits of the Dolphin Neurostim’s pain relieving abilities. Our unit is helping thousands of patients in hospitals, chiropractic, massage, and physiotherapy clinics.

Will my insurance company pay for the Dolphin Neurostim?

Most private health plans, WISB, and the DVA will cover TENS devices. In most cases, all that is needed is a Medical Doctor’s recommendation.

Carpal Tunnel

Bursitis
Sports Injuries
Tendonitis
And more!

Testimonials

“The Dolphin Neurostim has revolutionized the way we treat patients with pain. While many treatment approaches have been proposed for patients in chronic pain, it has been the most successful. This method allows to treat not just the areas that hurt, but also the areas that are causing the problem.”

Dr. Chris Centeno, MD

“As a PT treating neuro special needs pediatrics for over 20 years, I have seen results with the Dolphin Neurostim when all other modalities failed. It gives new hope and the parents are always excited about the progress they see. I highly recommend the Dolphin Neurostim for any therapist.”

Julietta Planchart, PT

“I have been very impressed with the response to this form of therapy and believe it goes beyond the scope of traditional Acupuncture, trigger point therapies, and conventional TENS. My patients have been very pleased with their response and usually request follow up treatments.”

Dr. Gordon Ko, MD, CCFP(EM), FRCPC, FAAPMR
