COMPANY OVERVIEW

BetterAir is an innovative biotechnology company that developed THE WORLD'S FIRST *PROBIOTIC* AIR, SURFACE and OBJECT PURIFICATION SYSTEMS. Pioneering how indoor spaces should be treated, BetterAir is dedicated to restoring and preserving ecological balance in indoor spaces by harnessing the power of Environmental Probiotics. Offering all- natural, chemical free solutions to curb allergens, pathogens, mold and harmful bacteria to create healthier indoor living and work spaces.

PATENTED DESIGN & TECHNOLOGY

BetterAir's patented technology is designed to repeatedly release Environmental Probiotics- a vapor compound comprised of an organically cultured strain of probiotics called *Bacillus ferment*. Billions of micron-sized probiotics are emitted into the air to form a protective shield of microflora to purify the air, surfaces and inside objects. The probiotics work on a microscopic level and penetrate impossible to reach places to consume the resources that

mold, allergens, pathogens and harmful bacteria thrive on. The result is a healthy microbiome and balanced indoor space. Environmental Probiotics is FDA Registered and safe to be administered in homes, offices, schools, hotels, hospitals and mass transportation including buses, trains, airplanes, ships and vehicles.

WHY PROBIOTICS?

Approximately 100 trillion probiotics call our gut, home. They are essential to our survival and act as our natural defense system to help our bodies fight disease-causing bacteria, digest food, absorb nutrients and promote a health GI tract. They are commonly found in yogurts, fermented foods and digestive supplements.

Our methodology revolves around our saying, "If it's good for us, it's good for our environment." BetterAir leverages the power of beneficial probiotics to multiply and thrive in our environment to act as our protectors.

MARINE PRODUCT LINE

Protect yourself, employees and guests!

BA-1000 Marine Air Duct Purifier and Cleaner (up to 5,000 sq. ft.)

Benefits

- Automatic and continuous cleaning of air ducts and HVAC components. An all-natural, chemical free solution to curb bad odors, mold, fungus, pathogens and dust mites in humid spaces.
- Automatic Air purification
- Energy saving technology lowers energy consumption and costs
- Naturally combat the symptoms of Sick Boat Syndrome: fatigue, headache, dizziness, and nausea.

Features

- Up to 5,000 sq. ft. per AHU
- Patented probiotic technology targets unlimited spatial coverage
- Custom Pre-programmed timer
- Directly taps into existing HVAC systems
- 100% organic, chemical free and environmentally friendly
- Organic scented formula available
- Installation is fast, simple, and inexpensive-no special infrastructure required.

Item Dimensions: 11.8" x 9.8" x 5.9"

Item Weight: 13 lbs

Working Voltage: 110/230VAC

Liquid Capacity: 0.5/1 liter

Materials: Steel Housing; Rubber Hose;
Aluminum Bottle

Warranty: One year limited warranty
beginning from date of original purchase
and covers any defective product.

ENVIRONMENTAL PROBIOTICS COLD FOGGER

The Environmental Probiotics solution can also be **misted directly onto any enclosed space** with the use of an **Ultra Low Volume (ULV) fogger**, as Thermal foggers would destroy probiotics.

Ultra-low volume is very efficient as it uses less water and fills the room without the applicator needing to physically cover or clean all surfaces.

The technique enables to proactively **reduce foul odors** caused by mold and mildew while also improving the indoor air quality in a 100% organic, chemical free and environmentally friendly fashion.

SMALL SPACE SOLUTIONS (up to 800 sq ft.)

Protect yourself, employees and guests!

BA-008 Eco-Balancing Purifier

The BA-008 is an automated system designed to aerielly distribute a special probiotic compound engineered for long- lasting indoor air quality and surface protection. The cartridge lasts 70-100 days depending on use (low, medium, high, 10 hour sleep mode). Suitable for a variety of indoor spaces up to 800 sq. ft. including bedrooms, living areas, kitchens, closets and bathrooms.

Benefits

- Increases the ratio of good bacteria to bad bacteria including dust mites, mold and allergens
- Repeatedly mists Environmental Probiotics into the air and coats, shields and penetrates surfaces such as upholstered seating, carpeting, kitchen countertops, bathroom sinks and much more!
- Purifies inside out of reach places such as mattresses, pillows, fabric sofas, carpets and toys
- Eliminates bad odors caused by microbial contamination such as mold and mildew
- Low maintenance- replace cartridge

every 70-90 days (depending on use)

Features

- Compact design, whisper quiet and energy efficient
- Includes 1 replaceable 3.8oz. probiotic cartridge (lasts 70-90 days depending on use)
- Three modes (low, medium, high) and 10- hour pause function
- Highly effective in spaces up to 800 sq. ft.
- Includes power supply

Technology

- Patented design and innovative probiotic technology
- Environmental Probiotics dispersed every half hour for 30 seconds
- Clinically tested and Allergy Friendly UK certified
- 100% organic, chemical free and environmentally friendly

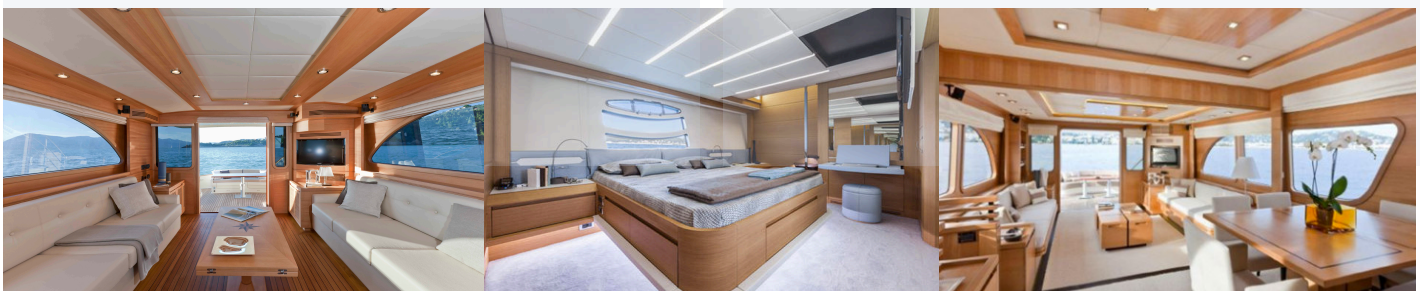

WHAT MAKES BETTERAIR DIFFERENT THAN OTHER PURIFIERS?

- Multi-level performance- purifies the **air**, **surfaces**, and **inside objects**
- Automatic and continuous cleaning of air ducts and HVAC components. **Air ducts are the ultimate breeding ground for mold** and allergens as they thrive in humid, moist and dark places
- **Eliminates bad odors** caused by microbial contamination such as mold and mildew
- Reduces the resources available to mold, allergens and harmful bacteria
- **Purifies inside out of reach places** such as mattresses, pillows, fabric sofas, carpets and light switches.
- Creates a **protective shield** on surfaces and inside shared objects to protect your personal space from contaminants
- Replenishes indoor spaces with beneficial probiotics to **restore indoor ecological balance**. Highly effective for those with dust mite allergies, pet allergies, weak immune systems, respiratory problems ·
- **100% organic, chemical free** and environmentally friendly

BETTERAIR FOR YOUR COMPETITIVE ADVANTAGE:

Ten reasons why your space needs BetterAir:

1. Warmth + Moisture + Darkness= MOLD
2. Ideal to maintain clean and healthy indoor environment between vacation season
3. Save on inefficient and costly air duct cleaning with revolutionary micro cleaning
4. Lower energy consumption with energy efficient technology
5. **Increase HVAC system efficiency** and longevity
6. Decrease filtration costs by up to 50% by reducing the amount of dust mites in supply and return airflows
7. Ideal for **brokers** to use before showing yachts and/or for cleaning companies and **yacht management companies** to use in their cleaning process.
8. Attract more people with a healthier indoor environment, free of foul odors caused by mold and bacteria.
9. Penetrate inside objects as most contaminants are not airborne
10. Decrease indoor air pollution and naturally **combat the symptoms of Sick Boat Syndrome (SBS)**- fatigue, headache, dizziness, nausea

SAFETY AND EFFICACY TESTING

Bacillus ferment is used as the EBA (Ecological Balancing Agent). Over five years of research, development and extensive clinical tests have proven results of long-term sustainability. We Additional safety and efficacy tests were conducted at selected clients' locations. All tests were handled and supervised by external independent labs, which conducted bacterial, allergen and mold counts on samples taken in the air and on fixed objects. The results are conclusive in all tested locations, the EBA bacteria became the dominant microbes in the treated zones and returned lower counts on dust mite allergens, pet allergens, mold spores and harmful bacteria. In addition to the certified lab results, users have reported overall improvement in quality of life and comfort with a significant reduction in allergic and asthma attacks.
