Active Care™
Standard Bed

Safely enter and exit the bed from a full chair position with the push of ONE button.

Since the inception of the hospital bed - one of the biggest challenges for caregivers and patients is safely getting in and out of the bed. Today, Med-Mizer has innovated the *ActiveCare* Bed to solve this challenge.

- **One Button SafeTurn Exit** — exclusive feature that fully automates the bed to turn into a chair and allow the patient to safely enter and exit the bed.

- **Full Chair Position** — full chair position to allow the patient the ability to sit in the bed for added comfort. Watch TV, eat a meal, and socialize with family and friends while remaining comfortably in bed.

- **RollBack in Place™** — head of bed can articulate to 80 degrees with the assistance of rollback in place to alleviate shearing/friction in the lower back.

- **Built in Stand Assist** — use the high/low as a stand assist to set the bed/chair height to an appropriate height to add assistance and safety when getting in and out of bed.

- **Advanced Features** — optional trendelenburg and reverse trendelenburg to help support advanced positioning needs and to help with feet elevation (potentially reduces swelling).

MED·MIZER®

ActiveCare® Standard Bed
SPECIFICATIONS

Deck Height Low .... 12.5"
Deck Height High .... 27.5"
Sleeping Surface .... 35"w, 42"w x 80"l
