

What Our Customers Say...

We searched all over for a bed like this. We were referred by a friend, and the very moment I saw the bed I had to have it. The mattress is very comfortable and the railings that come down are very convenient. I show your bed to everyone, and tell everyone about it. My daughter sleeps so much more comfortable now. We have had the bed for a year and a half, and we LOVE IT.

— Melissa and Leann McNutt, Decatur, Alabama

Our son's severe cerebral palsy leaves him at the mercy of gravity, and his father and I could not rest easy at night when Chris was sleeping. Your SleepSafe bed with its locking side panels and rectangular windows provides the perfect blend of security and comfort. Thank you for designing a safe haven for our precious little boy.

— The Wilsons, Pooler, Georgia

We are very happy with our new SleepSafe II bed for our special needs child. We did quite a bit of research before deciding to pursue this bed. Our 16 year old daughter has RETT Syndrome, and after corresponding with many parents on RETT NET we found out that many of them had SleepSafe beds. Shortly after getting your bed, our daughter came down with a respiratory infection. By elevating her head, she was able to breathe more easily and could also watch her favorite DVDs. She is facing back surgery next month, and this bed is going to help her (and us) tremendously.

— Dr. John and Sharon Flanders, Saunterstown, Rhode Island

We received our daughter's SleepSafe II full size bed. We are thrilled that it is so safe for Olivia, and she enjoys all that she can see, thanks to the clear side panels. I am 150% satisfied with the bed. Thanks to Sue for helping us by working with our insurance company. I will tell anyone I know who may need a bed like this about your company and wonderful product. Your bed is exactly what we were hoping for!

— Dave and Sara Evans, Maine

Choose the right Sleep Safe Bed for you!

No Room to Burrow

The *SleepSafe* precision-fit custom mattress fits tightly within the bed frame. Even with aggressive compression, it is virtually impossible to burrow deeply enough to create an entrapment issue or safety hazard.

Premium *Mason Medical* Memory-foam Mattress

Remarkable day-long comfort and support from this premium pressure-relieving mattress covered in flu-resistant, anti-microbial/anti-bacterial fire-retardant stretch Nylon fabric.

Maximum Safety

SleepSafe beds are a proven, ultra-safe solution for virtually eliminating entrapment and falls. Unique in the industry, these beds meet or exceed FDA guidelines on the **7 Zones of Entrapment**.

Unexpected Style

A bedroom isn't a hospital room—and it shouldn't look like one. The stylish *SleepSafe* beds set new standards for attractiveness and safety.

Attractive wood frame

Bed frames are constructed of wood, with choices including traditional oak, contemporary maple, or a rich natural cherry. All frames are designed to support up to 350 pounds.

Easy-access Safety Rails

Full-length wood safety rails are both hinged and rear-rollable for quick and easy accessibility.

Easily Moved

Locking casters provide excellent mobility.

Windows for Visibility

Clear non-breakable windows provide visibility for both the occupant and caregiver when the need to see or be seen is important.

Patented Design

SleepSafe beds are recognized as the ideal choice for children or adults with cognitive or physical disabilities. Our user-friendly safety system with releasable guard rail assembly holds a US Patent number 6,453,291.

Adjustability Options

Options include electrically controlled articulation to head and/or foot, as well as mattress height adjustability when needed.

LOW

MEDIUM

HIGH

Safety Rail Height – 3 Models

The highly acclaimed *SleepSafe* bed is available in three models offering safety rail height protection ranging from 10 to 36 inches above the mattress. Safety rails can be quickly rotated out of the way to provide immediate access. They are also easily removed.

Proper safety rail height is based on the anticipated activity level of the user, with more active users requiring additional height.

LOW – This is our classic *SleepSafe* bed with safety rails that extend 10 to 16 inches above the mattress.

MEDIUM – Our most popular model, which we call the *SleepSafe II*. Safety rails provide protection ranging from 10 to 25 inches above the mattress.

HIGH – For the most active users, our *SleepSafe* model is an excellent choice. Safety rails provide protection ranging from 17 to 36 inches above the mattress. The two safety rails are on one side of the bed. They operate independently so that either can be removed or individually rotated out of the way. When access is required from both sides, two additional safety rails (*Dual View*) can be specified for the other side of the bed.

Foundation Options

FIXED – This is our basic option. The mattress rests on a fixed foundation, which can be either a box spring or bunkie board, depending on your preference.

ARTICULATED – This is our semi-electric option. The mattress rests on a foundation that has both head and feet articulation, with motor-controlled movement conveniently operated by wired remote control.

ARTICULATED and HI-LO – This is our fully-electric option, and our most user-friendly. The mattress rests on a foundation that has both head and feet articulation, and is also height adjustable. The surface of the mattress can be adjusted from 17 to 34 inches from the floor, with all movement motor-controlled, operated electrically by wired remote control.

THE MATTRESS – All *SleepSafe* beds include a premium *Mason Medical Series 100 ShearCore™ Pressure Reducing* mattress. This technically advanced mattress fits precisely within the bed enclosure to provide exceptional protection from burrowing and entrapment. The mattress has four unique comfort zones for support and pressure relief. The top level is all-lying *Memory-III™ Visco Elastic* memory-foam that contours to the body. To describe all the details of this remarkably comfortable mattress would require a full page of information. For complete technical and construction details, visit our web site: www.SleepSafeBed.com.

Foundation Choices

FIXED – The mattress rests on a fixed foundation, which can be either a box spring or bunkie board, depending on your preference.

ARTICULATED (semi-electric) – The mattress rests on a foundation that has both head and feet articulation, with motor-controlled movement conveniently operated by wired remote control.

ARTICULATED and HI-LO (fully electric) – The mattress rests on a foundation that has both head and feet articulation, and is also height adjustable. The mattress can be adjusted from 22 to 38 inches from the floor, with all movement motor-controlled, operated electrically by wired remote control.

All foundations are designed to support up to 350 pounds.

Available in YOUTH, TWIN or FULL

The SleepSafe II Bed-Medium is available in:

YOUTH – 32 inch wide by 60 inch long mattress.
This bed is only available in the FIXED foundation.

TWIN – 38 inch wide by 77 inch long mattress

FULL – 52 inch wide by 77 inch long mattress

Extras

PADDING – Custom-fit padding is available for one or all sides to provide protection from contact with the bed frame. 3/4 inch high-density foam is encapsulated in easily-cleaned and waterproof PVC coated nylon.

IV ATTACHMENT – This 36 inch tall stainless steel pole with two Ram hooks attaches securely to the headboard.

DUAL VIEW SAFETY RAILS for HIGH BED – When increased visibility or accessibility is required, our HIGH bed can be ordered with see-through safety rails on both sides. This is standard with our LOW and MEDIUM height beds.

HEADBOARD/FOOTBOARD WINDOWS – Attractive non-breakable windows are available for both the headboard and/or footboard for increased visibility.

Size Options

Our **TWIN** bed is our most popular size. All twin mattresses are 38 inches wide by 77 inches long.

Our **FULL** size bed is the ideal choice when more room is needed. All full size mattresses are 52 inches wide by 77 inches long.

Wood Frame Options

Stylish *SleepSafe* beds are extremely safe and unusually attractive. Frames can be constructed using one of these distinctive woods:

OAK is the most popular choice. Oak is extra-hard and highly durable, and typically highlights a natural wood grain.

MAPLE is a lighter colored, more contemporary hardwood, showing very little grain pattern.

CHERRY is a rich hardwood that is often selected by those who prefer its distinctive combination of beauty and durability.

Choosing the Correct Bed

It's easy to choose the most appropriate *SleepSafe* bed for your needs—just mark your choices below:

1. Safety Rail Height: LOW MEDIUM HIGH
2. Foundation: BASIC with Box Spring BASIC with Bunkie Board
 ARTICULATED ARTICULATED and HI-LO
3. Bed Size: TWIN FULL
4. Frame: OAK MAPLE CHERRY
5. Extras: PADDING IV ATTACHMENT
 HEADBOARD WINDOW FOOTBOARD WINDOW
 FIVE INCH CASTERS DUAL VIEW SAFETY RAILS for HIGH BED

All *SleepSafe* beds include: Bed enclosure; Premium *Mason Medical* Pressure-Relieving mattress; Foundation; Casters; Shipping within the continental US; Assembly instructions; Tools necessary to assemble the bed; Manufacturer's Warranty.

PADDING – Custom-fit padding is available for one or all sides to provide protection from contact with the bed frame. 3/4 inch high-density foam is encapsulated in easily-cleaned and waterproof PVC coated nylon.

IV ATTACHMENT – This 36 inch tall stainless steel pole with two Ram hooks attaches securely to the headboard.

DUAL VIEW SAFETY RAILS for HIGH BED –

When increased visibility or accessibility is required, our HIGH bed can be ordered with see-through safety rails on both sides. This is standard with our LOW and MEDIUM height beds.

HEADBOARD/FOOTBOARD WINDOWS –

Attractive non-breakable windows are available for both the headboard and/or footboard for increased visibility.
