Cold, Heat, Electrical Stimulation, and Soft-Tissue Mobilization in the palm of your hand.

#DTSP1

THERMOSTIM™

The Dynatron ThermoStim Probe™, an optional accessory to our new Solaris Plus, is a soft-tissue mobilization tool that also allows a practitioner to deliver heat or cold therapy in combination with electrical stimulation—all at the same time—significantly reducing the time typically required to administer three separate treatments.

- Temperature Range: 35° - 112° F and reaches target temperature in less than 60 sec.
- Multi-surface head with edges and corners optimizes ThermoStim transfer and tissue mobilization

Power and Flexibility

Solaris Plus delivers 6 Stim waveforms including IFC, Premod, Biphasic, Russian, High Volt, Microcurrent, and Fixed Frequency IFC/Premod. In addition, Solaris Plus offers 3-Frequency Ultrasound and TriWave Light Therapy. **Best of all, Solaris Plus has the power to deliver up to 5 channels of Stim, Ultrasound, and TriWave Light Therapy through both Probe and Pads—all at the same time.**

Exclusive TriWave Light

Deliver any combination of 3-wavelengths of light (red, infrared, and blue) using the Dynatron TriWave™ Light Probe or 2 robust 5" x 7" TriWave Light Pads. Dual Light Pads allow

TriWave Light

for greater coverage of a joint, treatment of 2 separate areas simultaneously, and the ability to treat large areas of the body when placed side-by-side.

The Future is NOW!

The first of its kind, the revolutionary Dynatron ThermoStim™ Probe* combines cold or heat with electrical stimulation and soft-tissue mobilization. Treat a wide variety of conditions, save time, and enhance patient outcomes. ThermoStim, the future of therapeutic modalities.

Target & Target Sweep

By focusing the treatment precisely where it is needed, Dynatronics' unique TARGET feature provides a more effective interferential treatment. Simply glide your finger across the TARGET touch pad to move the center of interference to the site of your patient's pain.

Exclusive 3-Frequency Ultrasound

The only Ultrasound devices in the industry offering 1, 2, and 3 MHz frequencies for the greatest flexibility in depth of treatment.

Impressively Simple

Even with nearly unlimited flexibility, setting up a treatment has never been easier. Some treatments can be set up in as few as two key presses. Treatment parameters are highly visible, easy to read, and changed at the touch of a fingertip.
