Extremity Whirlpools

Use

E Series 22 Gallon Stationary Whirlpool with Pedestal E-22-SP

Product photo/image above may show some available options

E-22-SP Stationary Whirlpool with Pedestal is recommended for treatment of the foot, ankle and leg, to below the knee, with better cover-age and greater patient comfort.

Tank Capacity is 22 gallons.

Whirlpool Tank is 28"Lx 15"W x 18"D and is seamless welded construction, fabricated from heavy gauge, type 304 stainless steel, polished to a satin finish. Tank rim is reinforced with a concealed stainless steel rod. Tank bottom is seamless, rounded coved design to minimize bacteria buildup. Tank is fitted with a fixed raised pedestal for mounting to floor. A 2" Combination Drain and Overflow, and a Filler Spout are provided. (See roughing-in dimensions on the reverse side).

Turbine Raising and Lowering Device permits adjustment of desired height and direction of water agitation towards the area of the body to be treated. It is spring balanced and provided with a locking device.

Turbine Assembly functions both as agitator and emptying device. It is equipped with Underwriters Laboratorylisted 1/2 HP jet pump motor protected with an ABS plastic shell, and automatic thermal overload protector, and lifetime-sealed bearings. All parts contacting the water are stainless steel, chrome plated brass or bronze.

Thermometer is provided with a dual scale, adjustable calibration, and a stem inserts into a retainer to prevent rattle during whirlpool agitation.

GUIDE SPECIFICATIONS

Provide Stationary Whirlpool with Pedestal (specify model number and options) with a 22-gallon capacity, 28"L x 15"W x 18"D. Whirlpool shall be fabricated from heavy gauge, type 304 stainless steel. Construction shall be seamless welded and exposed surfaces shall be polished to satin finish. Tank shall have a reinforced rim and shall be fitted with a fixed raised pedestal. Bottom of tank shall be a seamless, rounded coved design to minimize bacteria build up. Provide a 2" combination drain and overflow, and a filler spout. Provide a turbine assembly with raising and lowering device which functions both as agitator and emptying device, permits adjustment of desired height, direction of water agitation, and can be locked into place. Turbine assembly shall be UL listed 1/2 HP jet pump motor with automatic thermal overload protector, and lifetime-sealed bearings. Provide a 3" dial thermometer with a stem retainer to prevent rattle when whirlpool is in operation.
