

LIMIT FALSE ALARMS.

Quick-Alert Universal Alarm

Pressure sensing technology for falls management

Tamper-proof hold button limits false alarms

Medline Quick Alert Universal Alarms are self-activated, auto-sensing systems that are always working. Each monitor is constructed from heavy-duty plastic that securely houses sophisticated electronics.

These alarms are highly recommended as part of a comprehensive falls management program. They have intuitive, easy-to-use features and they work in conjunction with pressure mats that are foldable for easy storage.

KEY FEATURES INCLUDE:

- High-, mid-, or low-level volume adjustment
- Nurse call connectivity
- Optional delay function
- 8 different tones and tunes to distinguish between patients
- Recessed hold button to reduce the chance of tampering
- Compatible with the only foldable mats on the market – making storage easy
- Two-year warranty

Item Number	Description	Qty.
