

BCS-GV-3010

Elite-8-Chamber Bio Vest

This 8 chambered all in one sleeve provides tissue fluid movement from the arm all the way to the thoracic duct. With a chamber located directly at the axillary area, scar tissue and axillary nodes are effectively addressed. Chest edema is not a problem with the Bio Vest. If the thoracic duct is blocked and/or not draining adequately, fluids will be redirected in a downward motion thereby creating new channels. This process, called lymphangiogenesis, is the magic performed by this sleeve and the ultimate goal for tissue fluid movement. Donning the garment is simple and the initial fitting insures a proper fit every time with no migration while in use. The Elite-8-Chamber Bio Vest provides the best possible solution for those with difficult conditions.

Key Features:

- Axilla Compression
- Chest Compression
- Triple Action Fluid Movement:
 - Axilla
 - Thoracic Duct
 - Directional Flow
- Adjustable fit with no migration.
- Easy Donning and Doffing

Indications for Use:

Primary/Congenital Lymphedema

- Milroys
- Praecox
- Tarda

Secondary Lymphedema:

- Lymph Node Dissection
- Lymph Node Obstructions
- Surgical Damage to the Lymph Vessels and/or nodes
- Radiation Therapy
- Trauma

Indications are not limited to the above, others may be determined by the treating physician.

Prescription Required

Contraindications:

- Active Deep Vein Thrombosis (DVT) – Blood Clot
- Active Cancer – with the exception of palliative care
- Infection – Prior to 72 hours of antibiotic therapy
- Congestive Heart Failure (CHF)
- Any other condition wherein compression is not recommended
