

**PHS Medical**  
by Pivotal Health Solutions

The PHS Medical Lift & Place Rack Station is designed for patients as a work conditioning tool. This occupational therapeutic tool is used to simulate lifting and loading tasks. Made with hardwood plywood construction, it can handle a 100 lb load capacity per shelf. The Lift & Place Rack Station features two adjustable shelves to help accommodate various lifting device sizes. It also works well with the PHS Medical work conditioning lift boxes. To prevent injury, product must be attached to wall. Mounting hardware not included.

#### STANDARD FEATURES:

- Load Capacity: 100 lb. per shelf
- 30"L x 18"D x 78"H
- Hardwood plywood construction
- Simulates lifting and loading tasks
- (2) Adjustable shelves
