- Increased product display visibility.
- Easily hangs from peg hooks or can be placed on a shelf.
- Attractive see-through packaging.

Posey Gait Belts provide caregivers with a secure hold point while assisting patients during supervised walking and transfers. When used correctly, they may also help to prevent back injuries to the caregiver. When not in use, the gait belt can be worn by the caregiver to ensure immediate availability when needed.

Posey Add-On Gait Belt Handles

Upgrade standard Gait Belts with a vertical hand grip for better support when assisting patients. Fits all 2” wide Gait Belts and the ergonomically contoured soft touch, polymer handles provide a firmer handhold. Weight capacity of 300 lbs. (136 kgs.) per handle.

Other Posey Gait Belts

Posey Transfer and Walking Belts

Posey Transfer and Walking Belts offer caregivers added support with multiple easy to grasp hand loops. The belt is made of machine washable black nylon webbing with green nylon hand loops. Belts are available with nickel-plated or quick-release buckle closures.

Application Instructions for Metal and Quick-Release Buckle: Follow standard instructions on previous pages for proper application of metal and quick-release buckles.

Washing Instructions for Posey Cotton and/or Polyester Transfer and Gait Belts:

For maintaining bright colors in non-contaminated Gait/Transfer Belts:

- Fasten all buckles to minimize damage during wash and dry cycles. Close hook and loop fasteners before washing to prevent lint ball build-up. Use stiff metal brush to clean “hook” material after washing. Test hook and loop adhesion before use, and discard belt if hook and loop does not hold securely. During the washing, process, metal buckles could bend and quick-release buckles could crack or break. DO NOT put buckles through extractors. ALWAYS ensure that all buckles are in good working order and are not cracked or broken before each use. Customers could expect up to 5% shrinkage in cotton materials over the life of the product.

- Laminated webbing wipes clean to help address facility cross-contamination concerns. Spring loaded, soft-locking buckle is easy to apply and molded closures.
- Spring loaded, self-locking buckle is easy to apply and molded closures.

Application Instructions for Metal Buckle:
1. With the Posey label facing outside, wrap the belt around the patient’s waist, pass the metal tip of the belt through the buckle and over the teeth of the buckle (Fig. 1).
2. Bring the tip of the belt across the front of the buckle and slip it through the other side (Fig. 2). Adjust it so it is snug, but not uncomfortable for the patient. You should be able to slide your open hand (flat) between the belt and the patient.
3. The strap should lay flat across the buckle. Tuck excess under the belt (Fig. 3).
4. ALWAYS grasp the transfer belt and the patient. Assist patient using your facility’s approved procedures.
5. Turn the buckle around to the patient’s back (tuck excess strap under belt).

Application Instructions for Quick-Release Buckle:
1. Release the quick-release buckle by pushing inward on the quick-release buttons.
2. Fit the belt to the patient’s waist size.
3. Once adjusted, wrap the belt around the patient and snap the buckle shut.
4. Make sure you can slide your open hand (flat) between the belt and the patient.
5. Turn the buckle around to the patient’s back (tuck excess strap under belt).

Application Instructions for the Posey E-Zee closure:
1. With the Posey label facing away from the patient, wrap the belt around the patient’s waist and pass the end through the first metal ring on the belt.
2. For waists up to 42” (107 cm), pass the tip through the second metal ring also. For waists 43” to 54” (109 cm to 137 cm), use only the first metal ring.
3. After passing the belt through the appropriate metal ring(s), fold it over itself and back in the opposite direction.
4. Secure the hook and loop closure by pressing both sides together firmly.
5. ALWAYS verify proper closure before use. Adjust the belt so it is snug, but not uncomfortable for the patient. You should be able to slide your open hand (flat) between the belt and the patient.

Posey Ergonomic Walking Belt
This white cotton belt is 5” (13 cm) wide and has three hand loops, one at each side and one horizontal loop in the back. The side handles are reinforced with plastic for a more secure grip. Attaches quickly with plastic quick-release buckles. Adjustable strap in back for improved fit. Machine washable.
