MPD-12-Color™

Magnifier, Photo Frame, Digital Clock

The MPD-12 (Magnifier, Photo frame, Digital clock) is an all new concept of multi-function low vision magnification products! The MPD-12 was specifically developed for ultra convenient use in the kitchen. However, of course it is just as well suited in any room of a house or even on an office desk. Weighing a mere 28 ounces, the ultra light weight screen can be easily mounted on any wall to maximize counter or desk space. Switching between magnifier, photo frame and digital clock is a one button operation. The MPD-12 makes a sensible and practical addition to whatever magnifier you may already have or it could easily be the first and only magnifier that you need in your home or office.
