

# Jeanie Rub®

## Variable Speed Massager

- NEW!** ➔ Improved motor performance
- ➔ An industry standard for professionals
- ➔ Built to ANSI standards and CSA certified

### Therapeutic Relief

Making bodies feel better since 1966, the original Jeanie Rub® delivers invigorating 1400-4600 rpm massaging action with a twist of the switch. The orbital action provides a softer and deeper massage than “percussion” type massagers. Convenient fingertip control allows you to easily adjust speed – lower speeds for soothing relief and faster speeds for a more invigorating experience. Enhance your massage techniques while reducing stress on your wrists and hands.

The Jeanie Rub is ideal for personal health, fitness and sports massage. It helps to naturally manage pain associated with chronic or overuse injuries by easing tension, promoting flexibility and helping to improve circulation. As an addition to any sports training regimen, it helps to decrease the risk of injury and reduce workout recovery time.

### High Quality Construction

The Jeanie Rub is designed to withstand years of use. All Jeanie Rub massagers are built in the USA to ANSI Standards and are CSA certified, ensuring they have been evaluated to meet or exceed consumer safety standards. The cast aluminum construction with red and black powder coat finish looks great and resists abrasions. Pad measures 4” x 9” (10cm x 23cm). Jeanie Rub accessories sold separately.

### Specifications

#### Product Selection:
