

SallyTube Single Patient Use

Go green and transfer patients and residents safely with SallyTube recyclable slide tubes.

SallyTube® Single Patient Use

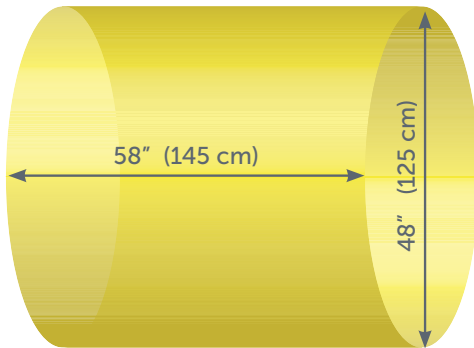

SallyTube Single Patient Use slide tubes can greatly improve infection control as well as improve manual handling over reusable slide sheets. With generous 50" x 48" standard dimensions, the SallyTube can accommodate patients and residents of all sizes.

During general patient or resident use, SallyTube Single Patient Use slide tubes can be used for several transfers and simply wiped down as needed or disposed of after use in high infection areas or isolation.

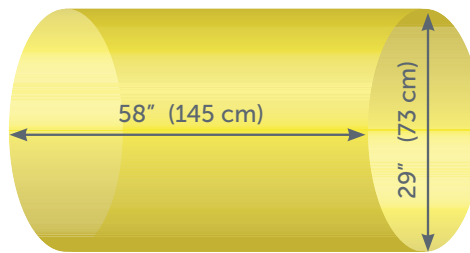

Standard Sizes

ST-5848S (58" x 48")

ST-5829S (58" x 29")

SallyTube Single Patient Use slide tubes are the perfect solution for lateral transfers in radiology, emergency departments, operating rooms, patient transport and isolation.

Ideal for lateral transfers of patients from to bed to bed, or stretcher to stretcher.

An optional plastic dispenser can be mounted in each room for convenient access.

SallyTube Single Patient Use

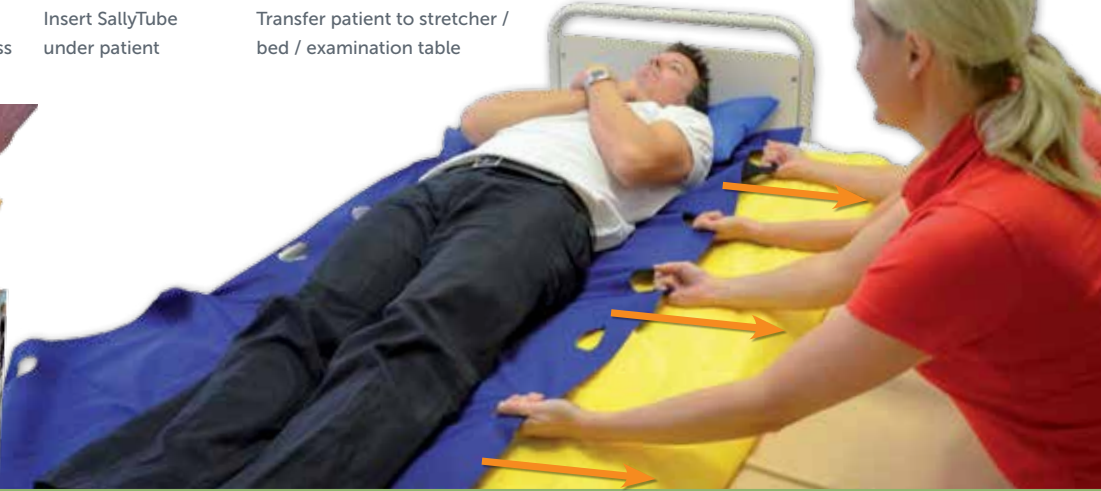

STEP 1

Pull out one sealed SallyTube from easy access wall dispenser

STEP 2

Insert SallyTube under patient

STEP 3

Transfer patient to stretcher / bed / examination table

Illustration above demonstrates use of SallyTube® (ST-5848S) with Tollos™ Draw Sheet with Handles (DPP7533H-80)
