

BALANCE PAD

Add Instability To Any Environment

SKU: WBSB4C

Product Description

The Balance Pad creates a slightly unstable standing surface, giving the sensation of floating. Each foot moves independently, forcing the body to balance by working the ankles and lower legs. The Balance Pad can be integrated into exercise routines to add difficulty or to speed up rehabilitation. It can also be used in the office to provide an Active Standing surface. The Balance Pad is a versatile and portable tool that anyone can use! *Packaged in brown ship carton.
