- ON : Connect the power cable and push the [START] button .
- OFF: Push the [STOP] button for 4 seconds.
- Display is off after 10 minutes of inactivity.
- The power turns off after 1 hour of inactivity.

\* For a 10000mAh potable battery-Usable for 6hours.

### ② Placing the board

Put the board on the base unit.

- The base unit automatically recognizes the board and proceeds with the training for each board.

### ③ Setting up the Affected Side

Set the affected side with the [START] button.

- From the direction where the [START] button is pressed, you can use the display and the button.

### ④ Controlling the Volume

When using the pegboard, you can control the volume to suit the user's conditions.

### ⑤ Setting Language

You can set the screen and audio language separately in <language> menu.

# 3. Type of Training

There are several training types you can perform with your Smart Pegboard.  
- The default training type may differ, as each board has its own optimized training.

## Freestyle

Place the pegs anywhere you want.

## Row Completion

Place the pegs in the given rows.

## Visual Training 1

Place the pegs in the given rows.

## Visual Training 2

When prompted, place the peg in the middle or at the end.

## Shape Completion

Place the pegs to complete the shape.

## Shape Recognition

Use the correct peg shape.

## Blackout

Completely fill the whole board with pegs.

## Randomizer

Place the pegs in the lit location.

**Smash a Mole**

Whack the moles before they go away.

**Snake Trap**

Trap the snake's body with a peg.

**Memory Placement**

Memorize the lit locations and place the pegs.

**Simon Says 1**

Memorize the sequence and place the pegs.

**Simon Says 2**

Memorize the sequence and place the pegs in reverse order.

**Pathfinder**

Connect all three lights to make a path.

**Find Home**

Place pegs to help guide blinking light through to its destination.

## ② Detail Training

The training proceeds in the selected order.

## ③ Results

After 15 seconds, the training result screen will automatically move on the next training session.

## 6. Session Training

Category	Description
Temperature / Storage Temperature	0 ~ 35 (°C) / -20 ~ 70 (°C)
Humidity & Storage Humidity	15 ~ 90 (%)
Time of Continued Usage	8 hrs

## 7. Detailed Device Specifications

Category	Description
Device Name	Neofect Smart Pegboard
Model Name	PB
Objectives	Manual Dexterity / Visual Motor integration / Visual Cognition and Shape Recognition
Dimensions	557(W) x 353(H) x 32(D) mm
Weight	6.32kg
Sensor	Hole sensor (Magnetic Recognition) Recognition : 7mm
LED	Type : High illuminance, 5V LED
LCD	4.3" TFT-LCD
Speaker	Built-in speaker for auditory feedback Power 1.2W
Charger Type	Micro USB 5pin

## 8. Quick Manual Information

Category	Description
Document No	IFU-RSP_C
Version	V 1.0.0
Date	March 25, 2020

## 9. Certification

기기의 명칭 : Neofect Smart Pegboard  
모델명 : PB  
인증번호 : MSIP-REM-NeO-PB-01  
인증받은 자의 상호 : NEOFECT  
제조사/제조국 : NEOFECT Co., Ltd. /  
한국 제조년월 : 2017. 08

Product : Neofect Smart Pegboard  
Model : PB  
Input : 5V — 1.5A  
Output : -  
Manufacturer : NEOFECT Co., Ltd.  
Country of manufacture : Korea
