

THERMAL VENT® OPEN WRAP ROM HINGED KNEE BRACE

- ROM hinges limit range of motion and provide knee stability
- Open wrap design is easy to apply and adjust
- Wraparound straps help prevent brace migration
- Gentle compression and warmth help relieve pain
- Soft and comfortable material wicks away moisture

THERMAL TECHNOLOGY

Engineered with MVT²:
MicroVentilated Thermal Technology™

Thermal Vent Supports are a valuable aid to help rehabilitate injured tissue. These products provide warmth and heat therapy to help increase pliability and elasticity of muscles and tendons, making them more responsive to therapy and exercise.

Available From:

FUNCTIONAL & COMFORTABLE

The Swede-O® Thermal Vent® Open Wrap ROM Hinged Knee Brace provides stability, comfortable support, gentle compression, and heat therapy to help relieve knee pain and promote healing. The ROM hinges have snap-in flexion (45°, 60°, 75°, 90°) and extension (0°, 10°, 20°, 30°, 40°) stops, and also provide medial and lateral knee stability. This product is anatomically designed for pre-surgical knee instability and post-surgical rehabilitation when flexion and extension control is indicated.

The front opening does not cause pressure across the patella which helps prevent aggravation to injuries and helps reduce tenderness and bruising. Popliteal cutout helps increase comfort and reduces material bunching during knee flexion. The adjustable closures provide a customized fit and allow for variations due to swelling while the wraparound straps help prevent brace migration. This product contours to the natural shape of the knee for comfort; bilateral design fits right or left knee.

SPECIFICATIONS

Product Selection:
BRE-6455 Swede-O® Thermal Vent®
Open Wrap ROM Hinged Knee Brace

Product Weight: .5 lb
Dimensions: 15" x 9" x 3"

Case Weight: 6 lbs

Case Dimensions: 18" x 10" x 4"
Case Quantity: 4

Materials: Outer lining: Nylon, Mid Layer: Neoprene, Inner Lining: Nylon.

Latex: This product is not made with natural rubber latex.

Your Thermal Vent Support should be a snug and comfortable fit.
Not too tight, not too loose. If in doubt, try next larger size.
